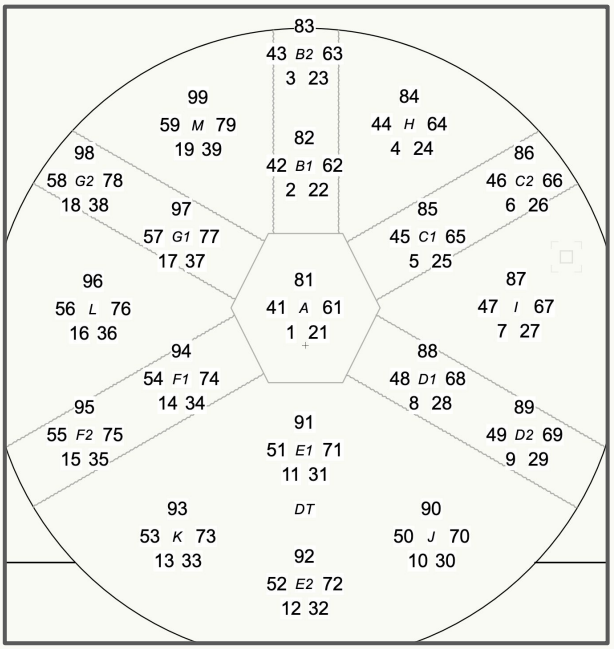
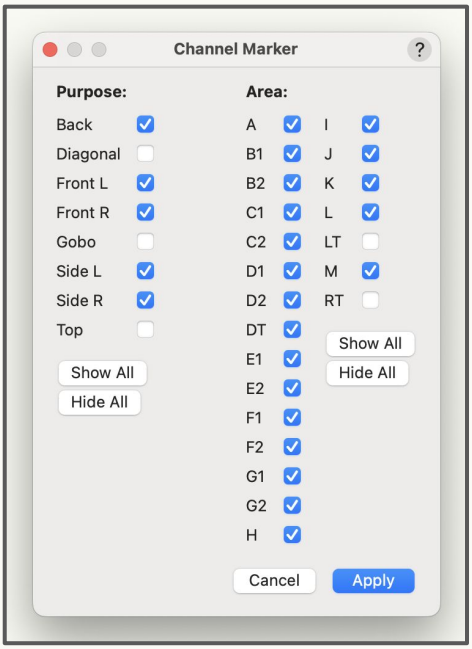
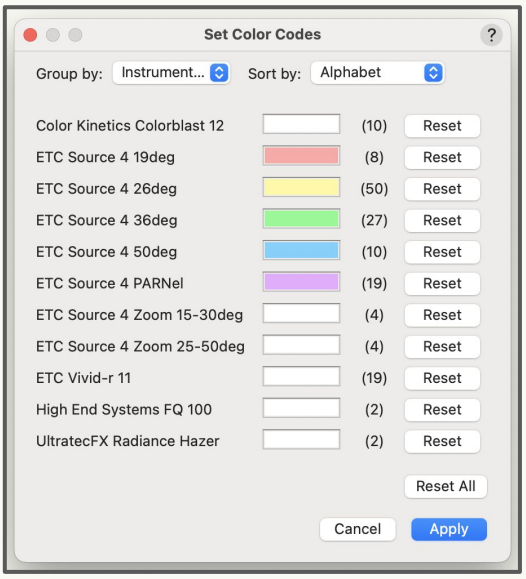
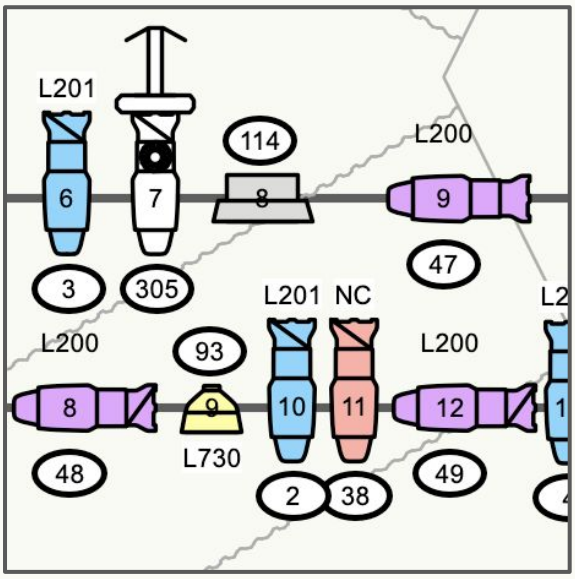
Vectorworks Tools



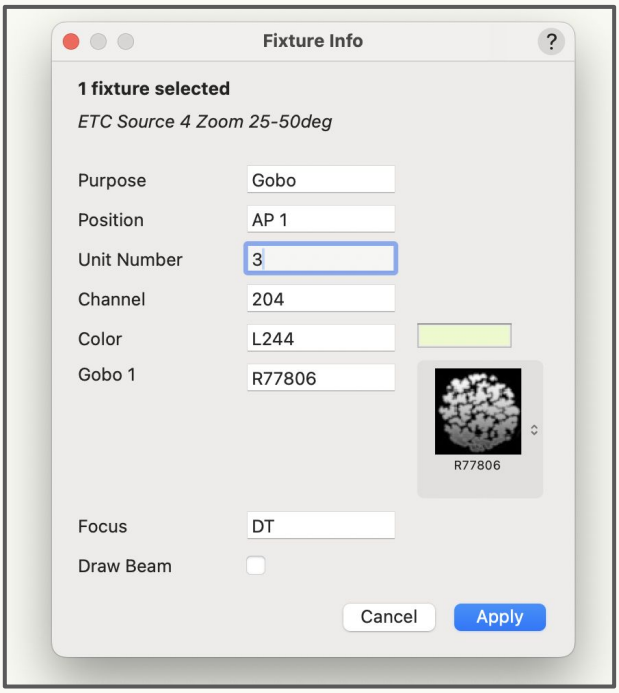


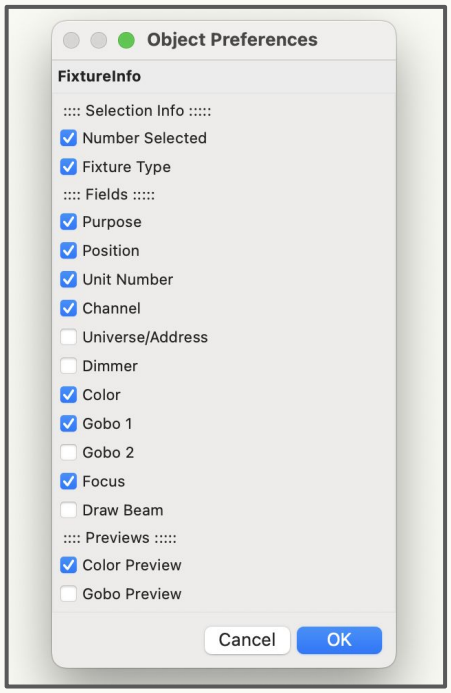
Channel Marker speeds up making your magic sheet by creating a custom object generated from fixture and focus point data. Not only is it faster than drawing by hand, but can pull the most recent data to make sure information is up to date.





Color Codes gives a quick way for you to color code your lighting fixtures, allowing you to easily assign colors for specific groups based on your choice of parameter.





Fixture Info gives a streamline and customizable alternative to the object info palette to help with easily editing fixtures.
